HIGHCHAIRS & **BOOSTERS**

Finding the right highchair is essential for keeping baby safe and comfortable at all times. There are a number of different models out there to choose from, and finding the right one for you depends upon finding a style that fits with your home decor and the individual size of your baby. There are highchairs that are incredibly economic, but perhaps don't provide all the ergonomic support and features that you desire. Most highchairs are adjustable so you can change the height and reclining position. Most highchairs also feature a washable seat and removable tray so that you can keep it clean at all times.

Baby Beds

When you bring your baby home, it is very important for you to give your baby a place of their own to sleep. This not only allows your baby to become more independent from an earlier age, but it reduces the risk of sids. Your new baby is a gift and as you enjoy your precious gift, you must give them a comfortable place to sleep. A bassinet is the perfect option for your baby because they have a comfortable place to sleep that is not overwhelming in size. Bassinets can also easily be moved around from room to room. As babies become adjusted to your schedule, having a mobile bed is very handy and will allow you to place the baby closer to you, allowing you to keep an eye on them while they sleep and give you peace of mind.
